

I strongly oppose the acceptance of Docket 03-104. As an operator of amateur and citizen based radio services, I can see the havoc that BPL will cause on those parts of the RF spectrum allotted for our use. Moreover, the interference caused by BPL will not be limited to amateur and general public radio services; public safety, businesses, AM/FM radio services, television broadcasts, and other important communication services will be interrupted as well. For the future and reliability of radio communications as we know it today, please do not accept Docket 03-104.
